

STRATHCLYDE PARTNERSHIP FOR TRANSPORT ENVIRONMENTAL POLICY STATEMENT

Strathclyde Partnership for Transport (SPT) is at the centre of shaping the transport system to meet the economic, social, recreational and environmental needs of Strathclyde. Our mission is to champion and deliver the development and provision of high quality sustainable transport choices in order to assist the growth of the Scottish economy and to enable all people who are living, working or visiting the West of Scotland to share in the benefits of this growth.

Environmental management is an integral part of our mission, and we are fully committed to minimising our impact on the natural environment and continually improving our environmental performance.

To achieve these objectives SPT will:

- Act to mitigate the environmental impacts of our operations;
- Develop, implement and regularly review an Environmental Management System that meets the requirements of ISO14001;
- Comply with all applicable environmental legislation and other relevant requirements;
- Strive to prevent the release of pollutants;
- Reduce our consumption of non-renewable resources;
- Set improvement targets and develop Action Plans for achievement;
- Involve and inform SPT stakeholders to help develop awareness of environmental issues;
- Communicate this Environmental Policy to all staff and stakeholders.

This policy will be reviewed regularly to ensure it reflects the aims of the organisation and continues to set the framework for environmental improvement.

The Chief Executive has overall responsibility for the implementation of this policy.

Ron Culley, Chief Executive
